

## URGENT PUBLIC NOTICE

### Water Treatment Plant Repair

Aug 9, 2023

Dear Hill Spring Resident,

We have just now been advised that our water operator will be replacing our treated water main flow meter system that was impacted by the recent power problems the plant experienced on the weekend of July 30<sup>th</sup>.

Our water plant will be off line on Thursday Aug 10, 2023 between the hours of **9am and noon**. We need residents NOT to use the treated water system AT ALL during those hours. It is imperative we maintain pressure in our lines while they replace the meter system. Again, DO NOT USE HOUSE/TAP water between 9am and noon.

If pressure drops due to usage we will need to go under a boil water advisory until water is then tested and deemed safe to use. We do not want this to happen.

Irrigation water (Raw Water) is not impacted by this notice.

We ask residents to monitor our web page as we will be updating this with information on the progress of the repair. Should we be able to maintain proper pressure and the repair goes smoothly, we will immediately update the village website with that information. Please visit [www.hillspring.ca](http://www.hillspring.ca) for this and other important information. If you do not have internet access we encourage you to visit a friend or family member who can help you.

If you have any questions do not hesitate to email [cao@hillspring.ca](mailto:cao@hillspring.ca) or 403-626-3876
